EXPERIENCE

Systems Support Engineer This Week's Story	Jan 2020 - Present
- Handled the technical needs across the entire organization, ensuring core systems ran reliably. - Automated core tasks using custom scripts, saving up to 3 hours of manual labor per working day. - Translated the needs of the staff and user base into real features and products. - Maintained system stability with a strictly limited budget.	

SELECTED PROJECT

Full-Stack Web Application with Integrated CMS Capstone Project	Jul 2025 - Sep 2025
- Built a containerized full-stack web app with an integrated CMS, focused on secure admin workflows, maintainability, scalability, and an intuitive user experience. - Used multi-stage Docker builds with SCSS compilation to streamline builds and keep deployment images lean. - Created an automated Azure DevOps CI/CD pipeline for building, tagging, and deploying to Azure App Service. - Designed a user-friendly UI/UX using Figma, Adobe Illustrator, and a modern frontend stack.
